

Winter Leagues

Setting Up Your Winter League

Handicapping systems at clubs now have a variety of different functions to ease the processing of competition scores and analysis.

We have received a number of inquiries from golf clubs looking to use their handicapping software to run **Non-Qualifying** Winter Leagues or Stroke Play competitions.

When setting up the winter league the handicapping software is asking for Category 1 Codes when adding a Cat 1 player to the Winter League. There is no requirement for this code, as the software should be able to add the details of the player to the league, without this prompt.

If Scottish Golf were to provide the Cat 1 code this would result in a completely new CDH Number and record being created for that player.

If you do receive the message asking for a Cat 1 code for winter leagues please contact your handicapping software provider who will talk through the correct set up of a winter league.

The following is a list of contact details for the different handicapping software providers;

Handicap Master Ltd
